Gilat to Introduce New Revenue-Enhancing Satellite Broadband Solutions at Satellite 2013

 The future in satellite internet connectivity will be showcased along with major advancements in land and air SOTM applications –

Petah Tikva, Israel – March 14, 2013 – Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, announced today it will showcase its newest solutions for internet connectivity as well as key advancements in land and air SOTM (satellite-on-the-move) applications at the Satellite 2013 show, taking place March 18 - March 21, 2013 in Washington, DC. These solutions are designed to benefit communication professionals and end users both in developed and emerging markets.

Gilat's Satellite 2013 highlights will include:

- The 'New Simple' in Internet Connectivity, Gilat's new SkyEdge II-c system offers ISPs and VNO's the business edge they are looking for in today's competitive world. The compact, fully integrated, easy to install system allows them to start small and expand as demand grows while delivering the business flexibility they need to provide customized and competitive Internet connectivity services.
- A breakthrough solution in content contribution and distribution for broadcasters,
 Spacenet's Dual-Access platform combines the flexibility, control and efficiency of TDMA with the sheer speed of SCPC. This 'make-or-break' advantage for today's broadcasters will be demonstrated live at the show.
- Selected by Honeywell for their airborne antenna systems to provide in-flight connectivity
 to the Inmarsat Global Xpress (GX) network, Gilat's Wavestream amplifiers and
 transceivers set the highest standards for performance, efficiency and power. Among the
 Wavestream products we will be featuring are the Aerostream Transceiver and the
 Matchbox Mini Block Upconverter (BUC).
- Gilat's new UAV terminal addresses the defense and military market's critical need to
 exploit the full capabilities of the aircraft's operational range. As one of the industry's
 smallest and most compact aerial solutions in its category, the Gilat integrated approach
 can dramatically increase mission effectiveness.
- The **EagleRay 7000** is part of Gilat's RaySat series of low-profile, in-motion, two-way antennas for mobile communications-on-the-move (COTM). Compact, aerodynamic and vehicle-mounted, the new EagleRay 7000 is a step ahead of other antennas in its

category in delivering mission-critical data, voice and video for secure, real-time information flow at speeds exceeding 10 Mbps on standard satellites. The antenna can be operated virtually anywhere in the world.

These products will be joined by other Gilat VSAT innovations, SOTM antennas, military solutions, and BUCs and transceivers at booth #6057. To set a meeting with one of our product experts, please contact us here: http://www.gilat.com/satellite-2013-conference-and-exhibition

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
