Gilat and Huawei Partnering to Deliver Cellular Backhaul Solution to a Leading Southeast Asian Mobile Network Operator

Petah Tikva, Israel, 16 January, 2013 – Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced that it has signed an agreement with Huawei for the delivery of its SkyAbis cellular backhaul solution to a leading Southeast Asian Mobile Network Operator (MNO). As part of the project, Gilat will supply and install a SkyEdge II hub, SkyEdge II Pro VSATs, and related services including remote site installation. The majority of the sites will replace older SCPC modems that are currently in use.

The SkyAbis network will support both 2G and 3G BTS/Node B sites as part of a major upgrade to the Mobile Network Operator's nationwide cellular infrastructure, and will provide improved bandwidth efficiency and higher throughputs. The cellular backhaul solution enables the network operator to significantly save on satellite capacity through the use of the SkyAbis Dynamic Allocation Multiple Access (DAMA) capabilities which allocate satellite capacity to the site, as and when required. This also enables the operator to expand the network to additional sites, where previously it was not economically feasible.

“We are pleased to be partnering with Huawei on such an advanced cellular backhaul deployment,” said Stephane Palomba, Regional VP for Asia, at Gilat Satellite Networks, “As many MNOs are looking to extend their cellular coverage to more remote locations, cellular backhaul via satellite is the optimal solution for rapid, economical deployment.”

Gilat is one of today's leading providers of cellular backhaul solutions, supplying mobile operators around the world with satellite ground equipment and services that enable them to increase ARPU and expand their reach into new geographies, while rapidly complying with emerging government regulations.

Gilat's SkyAbis is a prepackaged solution for cellular backhaul, based on Gilat's SkyEdge II multi-service platforms. The solution enables operators to deploy hybrid networks that extend the reach of their terrestrial and cellular infrastructure to remote communities. SkyAbis features traffic optimization and dynamic bandwidth allocation for GSM, CDMA 2000 and UMTS backhaul, with much higher space-segment efficiencies when compared to SCPC.

For more information regarding Gilat's cellular backhaul solutions please visit www.gilat.com/cellular-backhaul.

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
