Gilat Launches the New Scalable SkyEdge II-c Platform For Ka and Ku-band Internet Access

- The New Simple in Internet Connectivity provides operators, VNOs and ISPs the business flexibility they need to provide customized and competitive Internet broadband services -

Petah Tikva, Israel – February 25, 2013 – Gilat Satellite Networks Ltd. (NASDAQ: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced the launch of SkyEdge II-c, the New Simple in Internet Connectivity. SkyEdge II-c supports Ka-band and Ku-band internet services for both consumer and enterprise applications, including fast web browsing, video streaming, IPTV, VoIP and other bandwidth-intensive services.

Gilat has drawn on 25 years of providing satellite ground equipment, experience garnered from tens of thousands of Ku consumer users and its recent successful launch of Ka products and solutions, to introduce the SkyEdge II-c platform. SkyEdge II-c's scalable architecture enables operators to start small and expand later as demand grows, while delivering the business flexibility they need to provide customized and competitive Internet broadband services.

"It's never been easier to offer your customers the right Internet service plans and bandwidth usage levels to fit their needs," explains Hagay Katz, Gilat's AVP, Head of VSAT Line of Business. "Our new SkyEdge II-c platform dramatically simplifies your network operations and can now provide your ISPs and VNOs the business flexibility to deliver customized and competitive Internet plans and services. Compact, fully integrated, and easy to install, SkyEdge II-c is the New Simple in Internet Connectivity."

Key Features of SkyEdge II-c Platform

The SkyEdge II-c system employs sophisticated features and capabilities that help deliver competitive services while simplifying network operations, including:

TotalNMS, a completely new and modern web-based network management system provides simplified operations for small and large networks, as well as customized capabilities for Service Providers, ISPs and VNOs;

Fair Use System (FUS) delivers flexible and competitive Service Level Agreements (SLAs) including configurable usage plans per network and per ISP, free time zones allowing plan hour exclusion, top-up options with automatic redirection to walled gardens, fair allocation of bandwidth based on network congestion, customer priority and usage profile, and more;

ISP Management Interface supports wholesale service models, machine to machine and secure GUI interface to define SLAs (MIR/CIR), monitor VSAT status, and support service activation and provisioning allowing them autonomous business operations. An advanced usage-based billing system enables billing as per ISP requirements;

Multi-tiered Acceleration and Compression enables fast web surfing and application response using TCP Acceleration, Unique HTTP acceleration (DNS Caching, Pre-fetching, Compression & Optimization), Payload and IP Header compression;

Rich IPv6 Stack with comprehensive feature set and IP routers provides advanced, comprehensive support for IPv6;

Do-It-Yourself Ka VSAT Installation saves installation costs and eliminates on-going operations complexity;

New, Self-installable Compact Hub enables rapid assembly and installation with a competitive entry price that allows customers to start small with a lower initial investment and scale as needed;

Enhanced System Security provides secure service to the service provider and to end-users with over-the-air HW-based AES-256 encryption. The system also employs X.509 terminal authentication, authorization and accounting (AAA).

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in the United States, Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 85 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions.
