Gilat's Market-Leading SkyEdge II-c Platform is DVB-S2X Ready

The Company's HTS-optimized X-Architecture will deliver 500Mbps (3.5 Gbps) wideband carriers, further enhancing its industry-leading, multi-core ARM VSATs to deliver up to 400Mbps

Petah Tikva, Israel, May 24, 2016 -- Gilat Satellite Networks Ltd. (NASDAQ, TASE: GILT), a worldwide leader in satellite networking technology, solutions and services, announced that its market-leading SkyEdge II-c platform will support the new DVB-S2X standard. Gilat's DVB-S2X-compatible X-Architecture hub and VSATs are optimized for HTS wideband networks and designed to support all applications.

Gilat's one-platform/multi-application X-Architecture for SkyEdge II-c, already deployed in several networks, will support the DVB-S2X transmission standard for true wideband, high-throughput operation. Gilat's X-Chassis is hardware-ready for the new DVB-S2X standard and will support simultaneous operations of both DVB-S2X and DVB-S2 carriers. The S2X portfolio is DVB-S2 backward-compatible and expected to be available starting the first quarter of 2017.

"The global community of solution providers and HTS operators has embraced our S2X-compatible SkyEdge II-c platform, due to the unprecedented capacity and efficiency of our X-Architecture," said Hagay Katz, Head of the VSAT Line of Business at Gilat. "With our new S2X wideband modulator cards and VSATs, we will maximize the throughput of HTS satellites. Our high-performance VSATs, which are already equipped with multi-core ARM processors, will leverage the powerful CPU to utilize the wideband S2X carriers and deliver up to 400Mbps throughput to a single site.

"This will also double the hub capacity that can be achieved with the same rack space," Mr. Katz continued. "HTS operators will be able to dramatically improve their ROI across all market segments, including Broadband Access, Cellular Backhaul, Enterprise and Mobility, by providing much-needed faster speeds and enhanced user experience."

About Gilat

Gilat Satellite Networks Ltd (NASDAQ, TASE: GILT) is a leading provider of products and services for satellite-based broadband communications. Gilat develops and markets a wide range of high-performance satellite ground segment equipment and

VSATs, with an increasing focus on the consumer and Ka-band market. In addition, Gilat enables mobile SOTM (Satellite-on-the-Move) solutions providing low-profile antennas, next generation solid-state power amplifiers and modems. Gilat also provides managed network and satellite-based services for rural telephony and Internet access via its subsidiaries in Peru and Colombia.

With over 25 years of experience, and over a million products shipped to more than 90 countries, Gilat has provided enterprises, service providers and operators with efficient and reliable satellite-based connectivity solutions, including cellular backhaul, banking, retail, e-government and rural communication networks. Gilat also enables leading defense, public security and news organizations to implement advanced, on-the-move tactical communications on board their land, air and sea fleets using Gilat's high-performance SOTM solutions. Gilat controlling shareholders are the FIMI Private Equity Funds. For more information, please visit us at www.gilat.com
