Gilat's in-flight modem now powering Gogo's commercial service

Gogo's Next Generation Inflight Modem takes Flight

CHICAGO, July 31, 2017 /PRNewswire/ -- Gogo (NASDAQ: GOGO), the leading global provider of broadband connectivity products and services for aviation, announced today that its next generation modem has been introduced into commercial airline service.

The proprietary features of the new modem will significantly increase throughput from the satellite to end users on the aircraft. The modem is capable of delivering more than 16x the throughput of Gogo's existing modem, which offers plenty of room to support the increased capacity of next generation high-throughput satellites as they come online.

The new modem includes dual channels to simultaneously support internet traffic and broadcast IPTV. It also features faster and more sophisticated processing that enables much shorter hand-offs from one satellite to the next.

"We are always looking at new innovations in each component of our connectivity solutions," said Anand Chari, chief technology officer. "This new modem greatly improves the performance of our industry leading 2Ku solution, as well as our Ku solution, and is forward compatible with new HTS satellite constellations. This modem helps us future proof our in-flight connectivity solutions."

The new modem will be retrofitted on more than 450 aircraft on which Gogo's 2Ku or Ku systems are installed through an easy plug and play installation process. In addition, the 2Ku system installed on Gogo's backlog of more than 1400 aircraft will include the new modem.

About Gogo:

Gogo is the Inflight Internet Company. We are the leading global provider of broadband connectivity products and services for aviation. We design and source innovative network solutions that connect aircraft to the Internet and we develop customizable services for our aviation partners. Once connected, we provide industry leading reliability around the world. Our mission is to help aviation go farther by making planes fly smarter, so our aviation partners perform better and their passengers travel happier.

You can find Gogo's products and services on thousands of aircraft operated by the leading global commercial airlines and thousands of private aircraft, including those of the largest fractional ownership operators. Gogo is headquartered in Chicago, IL with additional facilities in Broomfield, CO and locations across the globe. Connect with us at gogoair.com.

Cautionary Note Regarding Forward-Looking Statements

Certain disclosures in this press release include "forward-looking statements" that are based on management's beliefs and assumptions and on information currently available to management. Most forward-looking statements contain words that identify them as forward-looking, such as "anticipates," "believes," "continues," "could," "seeks," "estimates," "expects," "intends," "may," "plans," "potential," "predicts," "projects," "should," "will," "would" or similar expressions and the negatives of those terms that relate to future events. Forward-looking statements involve known and unknown risks, trends and uncertainties, many of which may be beyond our control, that may cause Gogo's actual results, performance or achievements to be materially different from any projected results, performance or achievements expressed or implied by the forward-looking statements. Such risks, trends and uncertainties include those described under the heading "Risk Factors" in the Company's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission ("SEC") on February 24, 2017 and its Quarterly Report on Form 10-Q for the quarter ended March 31, 2017 filed with the SEC on May 4, 2017. Forward-looking statements represent the beliefs and assumptions of Gogo only as of the date of this press release and Gogo undertakes no obligation to update or revise publicly any such forward-looking statements, whether as a result of new information, future events or otherwise.
