

Gilat Secures Multi-Million Dollar IFC Order to Power Commercial Aviation Connectivity

AeroStream amplifiers provide certified RF capability on commercial aviation aircrafts

Petah Tikva, Israel, March 4, 2026 – Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, today announced that it received a multi-million dollar order from a leading In-Flight Connectivity (IFC) Integrator for Gilat Wavestream’s AeroStream Ka-band Wideband amplifiers to support the deployment of connectivity solutions on commercial aviation aircraft. Deliveries are expected over the next 24 months.

Gilat Wavestream’s AeroStream Ka Transceiver is designed for IFC systems for commercial use. This equipment is already certified for most commercial and business aircrafts and will enable streamlined integration and accelerated fleet deployment while maintaining consistent performance.

“We are pleased to see continued demand and adoption of the AeroStream 60W Ka band Wideband BUC,” said **Edgar Khachatryan, President, Gilat Wavestream**. “Our Ka-band aviation solutions are designed to meet the operational and certification requirements of commercial aircraft, and with more than 5,000 aircraft flying with Gilat Wavestream IFC products, we continue to support large-scale, reliable connectivity deployments across the global aviation market.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and ESAs, highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat's products and tailored solutions support multiple applications including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace and critical infrastructure clients all while meeting the most stringent service level requirements.
