

Gilat Receives Over \$10 Million Order to Support LEO Constellation

Powerstream enables high-power, high-efficiency Ka-band amplification for large-scale LEO, MEO & GEO gateway deployments

Petah Tikva, Israel, February 04, 2026 – Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, today announced that it has received an order for over \$10 million from a leading ground gateway antenna provider to support the continued rollout of ground infrastructure for a leading Low Earth Orbit (LEO) constellation. Deliveries are expected over the next 12 months.

The order, for Gilat Wavestream’s Powerstream Ka solid state power amplifier, supports high-capacity gateway sites by delivering reliable, long-lasting, high-power Ka-band amplification required for continuous and cost-effective LEO, MEO & GEO gateway operations.

“We are pleased to continue supporting this large-scale LEO ground gateway program,” said **Edgar Khachatryan, President, Gilat Wavestream**. “Our Powerstream solutions are purpose-built for the scale and performance demands of LEO, MEO & GEO ground gateway installations, and with more than 2,000 Ka-band units delivered worldwide, we continue to play a leading role in enabling reliable, high-capacity gateway infrastructure.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and ESAs, highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat's products and tailored solutions support multiple applications including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace and critical infrastructure clients all while meeting the most stringent service level requirements.
