

Boeing and Gilat Achieve Key In-Cabin Offerability Milestone for Sidewinder Linefit Multi-Orbit Solution

Advances availability of an open, no lock-in line-fit model for IFC service providers

Petah Tikva, May 19, 2026 – Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, announced today that the Boeing Company and Gilat have reached a milestone toward offering Gilat’s multi-orbit Sidewinder electronically steered antenna (ESA) as a future line-fit solution for in-flight connectivity service providers.

Through IFC integration partners, Boeing will offer a line-fit Sidewinder terminal installation to accelerate the adoption of advanced inflight broadband connectivity. The compact ESA architecture simplifies installation, reduces long-term maintenance, and eliminates the cost and downtime associated with retrofit programs, enabling earlier entry into service with fully integrated connectivity. With an open, no lock-in model, Sidewinder enables airlines to enhance onboard services and boost operational efficiency while scaling to handle growing connectivity demand.

“Partnering with Boeing for this linefit program is a true honor and reflects our focus on bringing advanced connectivity solutions to the aviation market,” said **Ron Levin, President, Gilat Commercial Division**. “Sidewinder stands out as the industry’s

leading multi-orbit ESA terminal, and we are proud to be certifying it for linefit for IFC Service Providers.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and ESAs, highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat's products and tailored solutions support multiple applications including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace and critical infrastructure clients all while meeting the most stringent service level requirements.
