Gilat Receives \$11 Million in U.S. Department of War Orders, Reinforcing Role in Mission-Critical Defense Connectivity

Awards highlight continued U.S. defense demand for Gilat Defense's field services, ruggedized terminals and resilient multi-orbit connectivity solutions

Petach Tikva, Israel, July 7, 2026 - Gilat Satellite Networks Ltd. (NASDAQ: GILT | TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, today announced that Gilat DataPath has received orders totaling \$11 million to supply field services and custom SATCOM terminals to the U.S. Department of War. Deliveries are expected over the next 12 months. The orders add to Gilat Defense's growing base of U.S. defense activity and demonstrate the value of its combined services and terminal capabilities.

The awards reflect continued and expanding confidence in Gilat Defense's ability to provide mission-critical services and purpose-built communications systems that perform when it matters most.

Engineered for reliability in the most demanding operational environments, the custom SATCOM terminals feature ruggedized construction and advanced multi-orbit

operability, purpose-designed to meet unique military requirements and maintain resilient connectivity across the full spectrum of battlefield conditions. Additionally, the dynamic capabilities allow for the provision of trusted satellite communications services to support the critical needs of defense organizations in the field.

“These awards reflect the U.S. Department of War’s continued confidence in Gilat Defense’s ability to deliver reliable services and purpose-built SATCOM solutions for mission-critical defense operations,” said Nicole Robinson, President of Gilat DataPath. “We are proud to support the Department’s operational communications needs and to continue expanding Gilat Defense’s role as a trusted partner to U.S. defense customers.”

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and Electronically Steered Antennas (ESAs), highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat’s products and tailored solutions support multiple applications including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace and critical infrastructure clients all while meeting the most stringent service level requirements.
