

Gilat Awarded Over \$32 Million for Multi-Band DKET Systems Supporting U.S. Defense Network Resilience

Significant award reinforces Gilat Defense's expanding role in large-scale, mission-critical U.S. communications programs

Petah Tikva, Israel, September 9, 2026 - Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions and services, today announced that Gilat DataPath received an order valued at more than \$32 million from the U.S. Department of War for DKET Systems that operate across Ku, Ka and X-band networks, with deliveries expected over the next 12 months.

The award represents a significant expansion of Gilat DataPath's long-standing DKET activity and further strengthens Gilat Defense's position in larger and more complex U.S. mission-critical communications programs. Designed for rapid transport and deployment at alternate locations, the DKET platforms help customers maintain continuity of operations and restore high-capacity communications in dynamic operational environments.

"This award demonstrates the increasing importance of relocatable ground infrastructure in modern defense communications," said **Nicole Robinson, President of Gilat DataPath**. "When critical connectivity needs to be established or restored quickly and reliably, mobility becomes a strategic advantage. Our proven transportable

gateway solutions give customers the flexibility to rapidly enable and sustain communications wherever operational requirements demand."

This order further reinforces Gilat Defense's role as a trusted provider of advanced military communications solutions and highlights its ability to deliver resilient, transportable capabilities that address the evolving operational demands of today's battlefield. The order also supports Gilat's continued growth in strategic defense communications programs across the U.S. and allied markets.

About Gilat

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and Electronically Steered Antennas (ESAs), highly efficient, high-power Solid State Power Amplifiers (SSPAs) and Block Upconverters (BUCs), and integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat's products and tailored solutions support multiple applications, including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace, and critical infrastructure clients, all while meeting the most stringent service level requirements.
