

## **Gilat Awarded over \$7 Million for its New EnduroStream Solution to Support the U.S. Department of War**

*Gilat Defense establishing a new defense market category for high-power resilient SSPAs*

**Petah Tikva, Israel, April 29, 2026** – Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT), a worldwide leader in satellite networking technology, solutions, and services, announced today that Gilat Defense received an order for over \$7 million through a prime contractor to support the U.S. Department of War for its Gilat Wavestream’s EnduroStream solid-state power amplifier (SSPA) solution. Delivery is expected over the next 24 months.

This significant order for the EnduroStream product line opens a new market category within the defense sector. EnduroStream has introduced a new class of high-power SSPAs with built-in resiliency, designed to replace traveling wave tube amplifiers (TWTAs) in gateways and high-power terminal applications. EnduroStream delivers the power levels required for mission-critical defense environments while offering improved reliability, operational resilience, and lifecycle advantages over traditional TWTA-based solutions.

“This order confirms the need for a purpose-built, high-power solid-state solution that delivers the inherent advantages of SSPAs while meeting stringent power and resiliency requirements for modern military SATCOM,” said **Edgar Khachatryan**,

**President, Gilat Wavestream.** “It clearly establishes EnduroStream as a solution for defense customers looking to modernize ground infrastructure and transition to more resilient and maintainable architectures without compromising performance.”

### **About Gilat**

Gilat Satellite Networks Ltd. (NASDAQ: GILT, TASE: GILT) is a leading global provider of satellite-based broadband communications. With over 35 years of experience, we develop and deliver deep technology solutions for satellite, ground, and new space connectivity, offering next-generation solutions and services for critical connectivity across commercial and defense applications. We believe in the right of all people to be connected and are united in our resolution to provide communication solutions to all reaches of the world.

Together with our wholly owned subsidiaries Gilat Wavestream, Gilat DataPath, and Gilat Stellar Blu, we offer integrated, high-value solutions supporting multi-orbit constellations, Very High Throughput Satellites (VHTS), and Software-Defined Satellites (SDS) via our Commercial and Defense Divisions. Our comprehensive portfolio is comprised of a software-defined platform and modems, high-performance satellite terminals, advanced Satellite On-the-Move (SOTM) antennas and Electronically Steered Antennas (ESAs), highly efficient, high-power Solid State Power Amplifiers (SSPA) and Block Upconverters (BUC) and includes integrated ground systems for commercial and defense markets, field services, network management software, and cybersecurity services.

Gilat’s products and tailored solutions support multiple applications including government and defense, IFC and mobility, cellular backhaul, enterprise, aerospace and critical infrastructure clients all while meeting the most stringent service level requirements.
