

# EMBEDDED SOFTWARE ENGINEER TEAM LEADER

Madrid, Spain

Have you ever wondered how you can sit on an airplane at 30,000ft and surf the internet?

Sail in the Caribbean Sea, and upload your photos to Instagram?

**It's all a reality thanks to cutting-edge satellite communication systems! In some cases, there isn't really any other alternative!**

## ABOUT US

Gilat is a leading global provider of satellite-based broadband communications. With over 30 years of experience, we create and deliver deep technology solutions for satellite, ground and new space connectivity and provide comprehensive solutions and services.

Our portfolio is comprised of a cloud-based platform and high performance satellite terminals designed to work in harmony with satellite constellations, including VHTS and Software Defined Satellites in multiple orbits; high performance SOTM antennas; and highly efficient, SSPAs.

Join Gilat's newly established SW group in Madrid, Spain.

**We are looking for exceptional embedded software engineers to develop cutting-edge technologies for Gilat's next-generation products and services.**

As part of this team you will have the opportunity to make a major impact in the way Gilat develops, tests, and manufactures its products. Our company philosophy fosters product innovation, rapid product iterations and a liberating amount of autonomy.

## OUR VISION

**We believe in the right of all people to be connected.**

## YOUR ROLE

- Be a part of global software projects, develop embedded software solutions for our next generation networking technology
- Lead and participate in the software development lifecycle
- Take responsibility for developing algorithms to control other ecosystem elements like antennas and other communication equipment located on airplanes and ships
- Help make our vision a reality: Be a part of the development of future products – challenging and complex embedded systems
- Work with a global team of talented and experienced engineers

## DESIRED SKILLS & EXPERIENCE

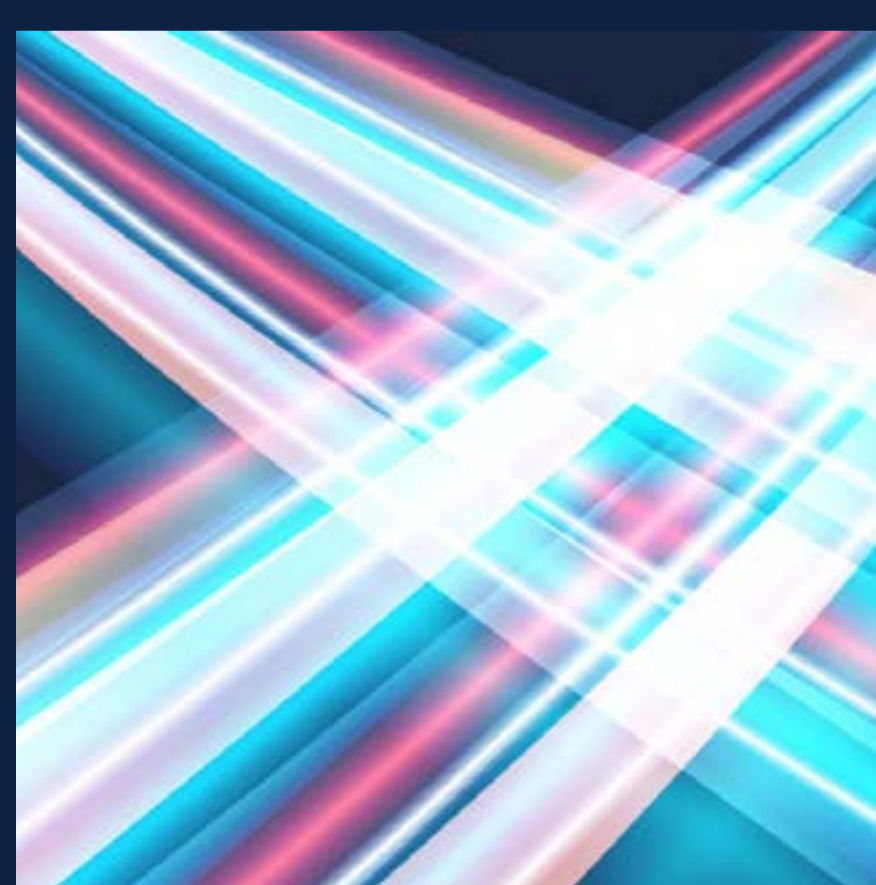

- Experience as a team leader
- Experience with C programming
- Experience with Linux operation systems
- 5-10 years of experience with embedded system
- Familiar with sockets programming
- Experience with Networking – a big advantage
- B.Sc. or higher degree in Computer Science\Electrical Engineering
- Good English
- Team player

## WHY JOIN US?

- 1 Shape the future of connectivity
- 2 Impact the way people live, learn, do business and lead healthy and fulfilling lives
- 3 Provide solutions to customers in need
- 4 Here's your chance to grow your career
- 5 You won't get lost in the crowd
